

## Rob & Kim Need Your Help

We have been made aware within the past few days of a family that is in desperate need. Their story is a sad one and long one and has been verified by multiple sources.

The husband Rob became sick suddenly at work and had to be taken to the hospital in fall of 2017. It was discovered that he was in kidney and heart failure and his blood was so polluted that he was not a candidate for heart surgery or kidney replacement. Rob goes for dialysis 3 times a week, if you know anything about what a person goes through on dialysis to have to do it 3 times a week is unbelievable torture. In 2016 they got a second mortgage on their home and property to help their son get a home for his young family. The company they went with cleared the trees from the property prepared the land for the home and then went out of business. There is an open lawsuit against this company along with several other people having a lawsuit against this company for the same thing.

Disability finally came through for this couple when it was decided by the doctors and his employer that he would not be able to return to work but his disability check doesn't even begin to meet the bills they owe let alone by the food they need.

Kim the wife must take Rob back and forth to the hospital every other day for dialysis and this has put a strain on her job position at a local restaurant. The restaurant chain she works for was recently acquired by another company and the new business model no longer has her position. Her pay was lowered, and she was moved to another location which was not conducive to her being able to do what she needed to do. Take her husband for dialysis and paying the minimum bill payments just to keep them afloat. The company recently transferred her location again making things even more complicated for her to take care of her family. And now she is without a job, she is somehow still able to take Rob for dialysis and watch her 4-year-old grandson M-F after school.

They are behind on their mortgage and every bill one might can think of. Kim is out looking for a job on a regular basis, but she lives in a tourist area and most places aren't hiring this time of the year and those that do have a job opening tell her that she is over qualified but all she wants is a job to buy groceries and pay the bills. They are praying for God to intervene and for her to find a job that will allow her to take her husband to the hospital and pay the bills.

This family has no idea that I am putting out this information, but they are in a desperate situation and need help.
